 [Personal Portfolio](#)  jesus.borrero.fernandez@gmail.com

• ABOUT ME •

Frontend Web Developer, passionate about technology and programming. Proficient in web development technologies, tools and methodologies, as Git/GitHub, CI/CD, SOLID, etc.

Focused on providing valuable solutions to problems. Enjoy working on productive and collaborative teams, making good relationships with my co-workers, while keeping respect and empathy.

"First solve the problem, then write the code".

• TECHNICAL SKILLS •

HTML/CSS/JS Typescript React Testing (Unit/Integration) Docker SQL/MongoDB

• FEATURED PROJECTS •

Scales2Care

A PWA to help health professionals to apply certain risk scales on hospitalized patients. The app integrates the most used scales there and facilitates their use, so health professionals have more time to focus on patients rather than searching for the scales and making calculations.

[Demo](#) [Github Repository](#)

RecipeAI

A beautiful and powerful recipe recommender app powered by AI. Just list the ingredients you want to include and the app will recommend you a delicious recipe based on your preferences.

[Demo](#) [Github Repository](#)

ToDoist

Simple and elegant ToDo web app to manage your tasks. It has DarkMode support and ColorTheme personalization out-of-the-box.

[Demo](#) [Github Repository](#)

GenPass

A secure password generator, with customizable length and characters, providing you a fast and secure password for any service.
