📍 Barranquilla, Colombia

· ABOUT ME ·

Junior Frontend Web Developer, passionate about technology and programming. Proficient in frontend web development technologies, tools and frameworks.

Focused on providing valueable solutions to problems. Enjoy working on productive and colaborative teams, forming good relationships with my co-workers, while mainting respect and empathy.

"First solve the problem, then write the code".

· LANGUAGES ·

Spanish - Native   English - B2

· TECHNICAL SKILLS ·

HTML   CSS   Javascript   Typescript   ReactJs   TailwindCSS   Jest   Git

· FEATURED PROJECTS ·

Scales2Care

A PWA to help health professionals to apply certain risk scales on hospitalized patients on Hospital Universidad del Norte. The app integrates the most used scales there and facilitates the useness, so health professionals have more time to focus on patients rather than searching for the scales and making calculations.

Demo   Github Repository

Quizzer

A small quizz-like game. Similar to "Who wants to be millionare?", here players are given four options, one right and three wrong. If they choose wisely, they accumulate points and continue to next round until reaching the final.

Demo   Github Repository

Web Sandbox

An HTML, CSS and JAVASCRIPT Interactive Playground.

Demo   Github Repository

Wordle Clone

A small clone of the famous game Wordle.
